Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

09/593,543

Applicant(s)

FORTE, STEPHEN P.

Examiner

Quynh H. Nguyen

Art Unit

2642

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 14 December 2005.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-4,9-18,28,30-32,36-41 and 43 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☐ Claim(s) 1-4,9-18,28,30-32,36-41 and 43 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
2. Applicant's amendment filed 12/14/05 has been entered. Claims 1, 28, 30, and 39 have been amended. No claims have been cancelled. No claims have been added. Claims 1-4, 9-18, 28, 30-32, 36-41 and 43 are still pending, with claims 1, 28, 30, and 39 being independent.

Claim Rejections - 35 USC § 103

3. Claims 1-4, 10-18, 28, 30-32, 36-41, and 43 are rejected under 35 U.S.C. 103(a) as being unpatentable over Harlow et al. (U.S. Patent 5,206,901) in view of Brennan et al. (U.S. Patent 5,329,578).

Regarding claims 1-3, 31, 32, 40, and 41, Harlow et al. teach a receiving module receiving a telephone call (col. 2, lines 32-34); a processor ("switching service point") identifying a dialed telephone number ("a destination directory number" - see Abstract and col. 2, line 12) associated with the call, the processor using the dialed telephone number to retrieve a first telephone number ("primary telephone number"), a second telephone number ("secondary telephone number"), the processor using at least one retrieved user preference ("query the shared database returns routing numbers") to route the call to at least two destination telephone numbers simultaneously (col. 2, lines

Art Unit: 2642

25-41), where in the at least two destination telephone numbers are selected from the group including the retrieved first and second telephone numbers and a voice mail box number (col. 8, lines 22-27).

Harlow et al. does not teach the processor holds and authenticates an answered call before connecting the answered call.

Brennan et al. teach the processor authenticates an answered call before connecting the answered call (col. 9, lines 14-17).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to incorporate the feature of the processor authenticates an answered call before connecting the answered call, as taught by Brennan, in Harlow's system in order to make sure the call is routed to the desired/right person in a shared telephone system, and not to any person who answers the telephone call.

Regarding claim 4, Brennan et al. teach the predetermined time corresponds to a number of telephone rings (col. 5, line 60 through col. 6, line 15).

Regarding claims 10 and 15, Harlow and Brennan do not teach the processor receives the call from a private branch exchange or public switched telephone network, and at least one destination is associated with a private branch exchange. Both calls origination and termination could be in the same or different switch, the same switch is the preferred method mentioned in claims 10 and 15.

Regarding claims 11, 12, 16, 36, and 43, Harlow et al. teach the call is routed to a cellular telephone, which can operate independently from the telecommunication device (Fig. 1, 136 and col. 4, lines 6-19).

Art Unit: 2642

Regarding claims 13, 14, 37, and 38, Brennan et al. teach the call is routed to a destination associated with a pager or a personal digital assistant (col. 6, lines 42-46).

Regarding claims 17 and 18, Brennan et al. teach the processor is connected to a local area network or the Internet and at least one user preference is input via the local area network or Internet (col. 13, lines 4-14 - *where Brennan discussed user accesses his or her profile via the service interface, hence via local area network or Internet*).

Claim 28 is rejected for the same reasons as discussed above with respect to claim 1. Furthermore, Harlow et al. teach a connect unit (Fig. 1, SSP 110); first communication device at an extension of the "communication network" associated with the user (Fig. 1, 111); second communication device to the user (Fig. 1, 112). Network 100 in Harlow has devices extensions off of the communication network (Fig. 1). Brennan et al. also teach network 12 have devices extensions off of the communication network (Fig. 1a) and (col. 9, lines 8-11 and col. 10, lines 17-20 - *where Brennan discussed shared telephone system, hence extension is an extension of the telecommunications network*).

Claims 30 and 39 are rejected for the same reasons as discussed above with respect to claim 1. Furthermore, Harlow et al. teach the machine-executable control program to perform various functions ("program processor 113 in SSP 110").

Art Unit: 2642

4. Claim 9 is rejected under 35 U.S.C. 103(a) as being unpatentable over Harlow et al. (U.S. Patent 5,206,901) in view of Brennan et al. (U.S. Patent) and further in view of Swan (U.S. Patent (5,978,451)).

Regarding claim 9, Harlow and Brennan do not teach the processor prompts a caller of the telephone call with a menu of call destination options and the processor places the call to at least one destination telephone number in accordance with an option selected by the caller.

Swan teaches a caller of the telephone call was prompted with a menu of call destination options and the call is routed to at least one destination telephone number in accordance with an option selected by the caller (col. 7, line 63 through col. 8, line 30).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to incorporate the feature of prompting a caller of the telephone call with a menu of call destination options and route the call to at least one destination telephone number in accordance with an option selected by the caller, as taught by Swan, in Harlow's and Brennan's systems thus making the system more efficient by allowing callers have more control of the desired destination.

Response to Arguments

5. Applicant's arguments filed 12/14/05 have been fully considered but they are not persuasive.

Applicant's arguments are addressed in the above claims rejection.

Applicant mainly argues that “the claimed invention employs a multi-threaded architecture that does not connect the inbound call immediately to the remote devices” and “the caller in the claimed invention is not connected to the remote device until the claimed invention electronically switches the calls together to form a single circuit”. These are not recited in the claims.

Applicant argues that neither Harlow nor Brennan teach a processor that holds and authenticates an answered call before connecting the answered call. It is unclear as connecting to what? It is unclear as at where a processor that holds and authenticates an answered call before connecting? Is the call being held at a central office of PSTN or PBX or remote device?

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
